

DEEP ART EFFECTS

Art Filters for Photos and Videos

Deep Art Effects GmbH, founded on 09/14/2016

The Deep Art Effects app was released in July 2016 and has enjoyed great popularity ever since. Deep Art Effects uses artificial intelligence to analyse and interpret the style of an artwork. The interpretation makes it possible to transfer and apply the style to any given photo.

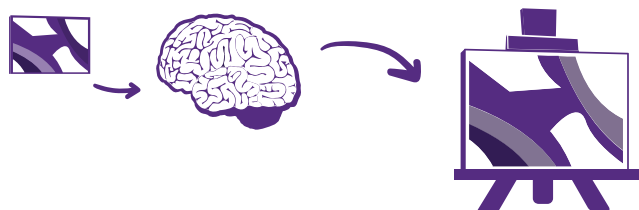

Our Motivation

The results of our technology clearly outmatch other prevailing photo filters.

That's what we want to offer to our clients!

Our Service

The Deep Art Effects GmbH offers know-how and practical experience in generating art by means of artificial intelligence.

Examples of Use

Examples of Use Our technology can be a useful extension for mobile apps in the area of photo or video, or an additional feature for photo service stations with service orders like photo books, canvases or posters. Another possibility is the extension of image and video editing software.

Programming Interface (API)

Use our interface for a fast integration. It is available as a web service via HTTPS/JSON. Work with our SDK for the programming languages Android, IOS (Objective-C), IOS (Swift), JavaScript, Java, PHP and .NET in order to achieve an even faster direct integration in your application. Apart from our public interface we offer dedicated business and offline solutions.

Anyone can become an artist, even without creative talent!

Simple photos become amazing works of art!

Deep Art Effects inspires imagination. How would Van Gogh or Picasso have painted my picture?

We support you with the deployment of our technology in your business. It can easily be integrated in your application landscape of photo, print or video solutions and you won't even have to obtain any special knowledge about high-performance computers or algorithms.

We will take care of the improvement, the development and the optimization of the technology and will provide you with the necessary hardware. A simple interface with a corresponding program library will make it easy for you to use the technology in your business. In addition, we continuously provide you with new art styles for the use in your solution.

Your Chances!

Media-effective marketing strategies for customer acquisition.

Innovative technology makes you reach new customer groups (professional use, photographers, artists).

Until now, sales were concentrated on classic artworks and photo prints. Deep Art Effects makes it possible to combine both.
